INTERESTS & PERSONALITY

Space, photography, technology, getting lost in virtual reality as well as the real reality by simply wandering outdoors. I enjoy cooking, cats, nature's patterns as well as science and its progress.

Cinema, Tv shows, Youtube, pop culture, Internet and its religion, science fiction, mountains, skiing, good food, video games, graphic design and animation 2d/ 3d.

I am motivated yet calm, shy but curious and of good will, remain responsible and thoughtful. I can handle pressure and stressful rushes and remain creative at all times.

Assured in my course, I am however always opened to criticism and discussion and possesses a great thirst for learning and improvement.
